EDUCATION

Louisiana State University (LSU), Baton Rouge, LA

May 2026

Undergraduate Software Engineer, Computer Science, Minor in Digital Media Arts and Engineering

GPA: 3.57

Related Coursework: Objected Oriented Design, Software Systems Development, Advanced Data Structures, Programming Languages, Video Game Design

TECHNICAL SKILLS

Programming Languages: Python, C++, C#, C, Java, SQL, HTML

Software: Unity, Godot, Flutter, Arduino IDE, Blender, Maya, Adobe Photoshop

PROJECTS

Pet Shop Management System

November 2025 – December 2026

- Collaborated with a team of six developers to build a full-stack pet adoption platform using React Native mobile and a Node.js command-line management system.
- Built and queried a relational database in Supabase to manage pets, customers, employees, and adoption transactions, utilizing SQL joins, aggregations, filtering, and reporting queries.
- Implemented backend functionality for creating, updating, searching, and deleting records through both a mobile application and an administrative CLI, culminating in live demonstration to 30+ students and professors.

Bayou Whispers

January 2026 – May 2026

- Developed an educational adventure game in Godot that teaches Louisiana wildlife, folklore, and cultural history through puzzle-solving and exploration mechanics.
- Implemented gameplay systems, user interfaces, and interactive environments while collaborating within a multidisciplinary team during a semester-long DMAE capstone project.
- Utilized iterative design and playtesting feedback to improve user experience, game balance, and educational effectiveness.
- Presented the project to 30+ students and faculty members during a formal classroom presentation and showcased the game at LSU's capstone exhibition.

2D Unity Platformer Game

January 2024 – May 2024

- Developed a 2D vertical-scrolling platformer game in C#, implementing player movement, collision detection, and level progression mechanics, using Unity DevOps to meet deadlines.
- Used agile practices to set up weekly meetings, fix bugs, and create game mechanics.
- Led a presentation for middle school students, educating them and creating interest in game development while gathering playtest feedback for bug fixes and design improvements.

WICS Hackathon

March 2025

- Collaborated with a team of five developers to create an innovative budgeting app using Flutter.
- Participated in UI development, earning an award for best UI/UX out of 16 teams.

Chillanium Game Jam

February 2026

- Developed gameplay systems and minigame logic in Godot for a fast-paced vehicle-switching game.
- Collaborated with team members to create and implement 2D pixel art assets using Aseprite, integrating visuals into the game.

EXPERIENCE

Host, Server, Cashier

June 2021 – August 2025

Tennou Sushi Bar, Harvey, LA

- Served food to customers in a timely and professional manner.
- Communicated and assisted customers ordering in person or over the phone.
- Managed finances, including distributing payments to employees and tracking profits.
